<tr>
<td>Code Meaning</td>
<td>A person who has duly filed in or for any state party to the Paris Convention for the Protection of Industrial Property, an application for a patent or for the registration of a utility model or for a utility certificate or for an inventor's certificate, may make use of the right of priority when filing an European application in respect of the same invention during a period of 12 months from the date of filing the first application. European applications, as well as multiple priorities may be claimed, notwithstanding the fact that they are originated in different countries. In this latter case time limits which run from the date of priority start from the earliest date of priority. The right of priority has the effect of counting the priority date as the date of filing of the European patent application for the purposes of articles 54 (Novelty) and 60 (Right to a European patent). The priority claim has also effect against other applications (of the same invention) filed by third parties in the 12 months period. It is not possible to claim priority once the term has expired.</td>
</tr>
</tbody>
</table>

INPADOC registers with this code the data (country code, serial number and filing date) of the industrial design application claimed as priority, which are published in the bulletin under the above-mentioned section next to INID code 30.
