Published European patent applications and international applications (Art.158)

1. European patent applications and international applications, which have entered the European phase, arranged in accordance with the International patent classification

legal basis
Arts. 75-76, 80, 89 EPC

data in PRS for
All entries in the European Patent Bulletin since number 1/78 (20.12.78)
first document affected EP 0000001; first entry in PRS on 20 December 1978

field meaning

yy nnnnnnn'

Year and serial number of the European application.

code meaning
A European patent application can be filed at the European Patent Office at Munich or at its branch at The Hague. In those cases where the law of a contracting state so permits it can also be filed at the central industrial property office or other competent authority of that state. A European divisional application must be filed directly with the European Patent Office at Munich or at its branch at The Hague.

The application receives a 8 digits application number in which the first 2 are the application year, the third identifies the place where the application has been filed and the last 5 constitute a serial number.

The date of filing, when first filing, is the one in which the minimum requirements are fulfilled. This being, an indication that a European patent is sought, the designation of at least one contracting state, information identifying the applicant, a description and one or more claims in one of the official languages, even though this two latter do not comply with the requirements of the Convention. If priority has been claimed the date of filing for the purposes of EPC articles 54 (Novelty) and 60 (Right to a European patent) is the filing date of the priority.

INPADOC registers with this code the application data (serial number and date) of the European application, which are published in the bulletin under the above-mentioned section next to INID codes 21 and 22 respectively.
