Country codes of the valid designated contracting states at the time of the A1 publication.

code meaning
In the request for the grant of a European patent is to specify the designation of the contracting state or states in which protection for the invention is desired. A designation fee is to be paid for any of the designated states within 12 months after filing the European patent application or, if priority has been claimed, after the date of priority; in this latter case payment may still be made up to 6 weeks after filing if this period expires later. There is a period of grace of 2 months after the normal time limit is expired provided an additional fee is paid. Due to the extension of the time limits for the designation fee, some of the designated states advertised under the above-mentioned heading may become not valid.

Designations of Switzerland and Liechtenstein are to be taken for both countries even if only one has been designated in the application.

INPADOC registers with this code the designated contracting states valid at the time the application with search report (A1) is published. These are advertised in the bulletin under the above-mentioned section next to INID code 84.

Up to the grant of the patent any designated state can be withdrawn therefore in following publications (B1, B2) the designated states may be reduced (see codes EP P AK B1, EP P AK B2). Modifications of the designated contracting states between the publication of patent documents (A1, A2, A3, B1, B2) are announced in section I.12 “Changes; Designated Contracting States” (see code EP P RBV).
